## About Us

As engineers, we've come to realize that the most impactful creations, the ones that truly shape the future, don't just come from individual brilliance alone but from finding the right partner. Someone who has not just complementary skills but also embraces a shared vision, is a bedrock of unwavering integrity, and has the courage to pursue audacious dreams. That is who we are, and that is what we do. This understanding is the very foundation of our company.

Our professional identity is built on the belief that engineering is not just about solving problems but is also about fostering reliance. We want our clients to trust in our solutions & processes and we cultivate that trust through open communication by keeping them informed every step of the way, fostering a collaborative environment, and ensuring transparency.

We are passionate about bringing your aspirations to life. For us, engineering is the art of transforming abstract concepts into tangible realities. When you partner with us, you're not just hiring engineers but you're also gaining dedicated partners who are committed to understanding your needs, embracing your vision, and working tirelessly to make your dreams a reality.

# Introduction

At DesignTeq, we understand the needs of industrial facilities to prioritize durability, efficiency, safety, and scalability to support complex production workflows and specialized equipment. As such, our engineers have the expertise to design innovative and tailored MEP.FP solutions that directly influence operational uptime, product quality, and energy consumption that complies with stringent environmental and safety regulations.

We at DesignTeq create innovative engineering solutions to help you maintain a competitive edge in a rapidly changing global market.

DesignTeq

# INDUSTRIAL

## Objective

Our aim is to deliver reliable, tailored, and specialized MEP.FP system solutions for industrial facilities, focusing particularly on safety and efficiency, with a goal of becoming a trusted partner for MEP.FP services for complex industrial projects across the country.

## Sector Specialization

We specialize in delivering robust, tailored, innovative, and code-compliant MEP.FP systems for complex and demanding industrial applications.

## Differentiators

- Expertise in process integration.
- Focus on safety and reliability.
- Understanding of industrial workflows.
- Commitment to code compliance.
- Advanced automation capabilities.

INDUSTRIAL

# MEP.FP Engineering Design Services

We provide code-compliant general design services for standard building projects as well as specialized and innovative MEP.FP engineering solutions that is tailored for complex structural and design environments.

## Mechanical Engineering

### GENERAL DESIGN SERVICES

Process Piping, HVAC for Large Spaces, Industrial Ventilation, Dust Collection System, Compressed Air System, and more.

### SPECIALIZED DESIGN SERVICES

Process Cooling, Clean Room Design, Hazardous Material Ventilation, Specialized Piping System, Industrial Automation Integration, and more.

## Electrical Engineering

### GENERAL DESIGN SERVICES

Power Distribution, Lighting and Control System Design, Emergency System, and more.

### SPECIALIZED DESIGN SERVICES

Hazardous and Classified Environment Compliance, Process Equipment Power & Control Integration, Power System Studies, Power Quality Analysis, Redundant Power System, and more.

## Plumbing Engineering

### GENERAL DESIGN SERVICES

Process Piping, Industrial Waste Treatment, Sanitary Waste System, Compressed Air System, Potable Water System, Vent System, Hot Water Equipment Design, and more.

### SPECIALIZED DESIGN SERVICES

Process-Specific Plumbing, High-Pressure System, Corrosion-Resistant Piping, Industrial Water Treatment, Chemical Piping, and more.

## Fire Protection

### GENERAL DESIGN SERVICES

Sprinkler System, Hazardous Material Protection, Explosion Protection, Foam Suppression, Industrial Code Compliance, and more.

### SPECIALIZED DESIGN SERVICES

Explosion Suppression, Hazardous Material Storage, Foam System, Clean Agent System, and more.

NOW Foods (Tablet Coater/Pre-Weigh Room)

NOW Foods, founded in 1968, is a family-owned company that is dedicated to producing high quality natural products at affordable prices. The new 90,000 SF manufacturing facility is situated beside their flagship manufacturing plant in Bloomingdale, Illinois, and is geared to significantly boost their production capacity by utilizing state of the art technology to highlight their commitment to sustainable practices and their dedication to environmental responsibility.

**PROJECT SPECIFICATION**

LOCATION: Bloomingdale, Illinois

SERVICE PROVIDED: MEP.FP

AREA: 90, 000 SF

YEAR: 2022

INDUSTRIAL

CSL Data Center

Lakeside Boat Storage

TESTIMONIAL

“

*By consistently demonstrating a genuine commitment to project goals, budget, schedule, and the overall success of both the project and its team, DesignTeq has proven to be an invaluable partner in every commission we have undertaken together.*

”

DAVID A. NELSON, AIA

Senior Principal  
K2N Crest

# We are DesignTeq and we help build dreams!

**Eduardo Sanchez, P.E.**  
Founding Principal

Eduardo employs a hands-on approach involvement to every project from conception through completion.

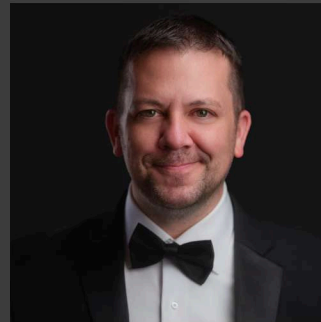

Eduardo is a building code and safety protocol specialist who has an extensive experience in the education, commercial, retail, healthcare, industrial, and residential sector.

**Neil Mantala**  
Founding Principal

Neil advances engineering excellence in every project they handle through his seamless integration of MEP design as a whole.

Neil specializes in mechanical and plumbing engineering system related to healthcare, commercial, educational, religious, hospitality, retail, and residential sector.

**Chris Richter**  
Chief Strategy Officer

Chris joined DesignTeq bringing with him his 20 years+ of industry experience. His understanding of the industry ecology led him to develop various innovative ways in navigating work-based dynamics to guarantee a successful project.

Chris specializes in Education, Healthcare, Life Science and Pharmaceutical related projects.
